Mohammad Basil Mirza - Software Engineer
Phone: 331-627-0196
Email id: basilmirza14@gmail.com

PROFESSIONAL SUMMARY:

Software Engineer with experience designing, building, and maintaining **scalable, consumer-facing web applications** using modern frontend and backend technologies. Strong background in **React and Next.js**, **Python/Django-based APIs**, and **cloud-native architectures on AWS**. Proven ability to work across the full stack, from database design and backend services to responsive user interfaces. Passionate about writing clean, maintainable code, improving system reliability, and collaborating with cross-functional teams to deliver high-impact solutions in fast-paced environments.

TECHNICAL SKILLS

Languages
Python, JavaScript (ES6+), TypeScript, Java

Frameworks & Tools
Django, Django REST Framework, Node.js, Express, React, Next.js

Backend & Systems
REST APIs, Microservices, Event-Driven Systems, Schema Design

Databases
PostgreSQL, MySQL, MongoDB, SQL Server

Cloud & DevOps
AWS (EC2, Lambda, S3), Docker, GitHub Actions, Jenkins

System Design & Foundations
Microservices Architecture, Schema & Data Modeling, Data Structures & Algorithms, Object-Oriented Design, Debugging & Performance Optimization

PROFESSIONALEXPERIENCE:

Ensuredit

Software Engineer

What I Worked On

- Designed and developed **consumer-facing web applications** using **React.js and Next.js**, with a strong focus on **performance, responsiveness, and accessibility**.
- Built and integrated **RESTful APIs** to power dynamic, data-driven user interfaces and frontend business logic.
- Implemented **state management** using **Redux and React Context**, supporting complex UI flows and scalable application architecture.
- Collaborated closely with **designers, product managers, and backend engineers** to translate requirements and user feedback into high-quality product features.
- Optimized frontend performance through **code-splitting, memoization, and efficient component rendering**, improving load times and user experience.
- Applied **modern JavaScript (ES6+) and TypeScript** best practices to produce clean, maintainable, and type-safe code.
- Actively participated in **code reviews**, contributing to code quality, consistency, and shared frontend standards.
- Diagnosed and resolved **production issues**, ensuring application stability and smooth user experiences.
- Worked within **Agile/Scrum environments**, contributing to sprint planning, estimations, and on-time feature delivery.

Fission Labs

Fullstack Developer

What I Worked On

- Designed and developed **scalable backend services** using **Python (Django) and Node.js**, supporting web applications with growing user and data demands.
- Built and maintained **RESTful APIs** to handle **high-volume and real-time data requests**, enabling seamless frontend integrations.
- Designed **relational and NoSQL data models**, working with databases such as **PostgreSQL and MongoDB** to ensure data integrity and performance.
- Developed frontend features using **React.js, JavaScript, HTML, and CSS**, delivering responsive and user-friendly interfaces.
- Deployed and operated applications on **AWS**, leveraging services such as **EC2, S3, and Lambda** to support cloud-based architectures.
- Implemented **logging, monitoring, and debugging strategies** to improve system reliability and quickly resolve production issues.
- Collaborated closely with **product, design, and engineering teams** to deliver features aligned with business and user requirements.
- Broke down complex technical requirements into **well-defined, manageable tasks**, contributing to predictable and timely delivery.

Captivate Softech

Associate Software Engineer

What I Worked On

- Developed backend components using **Java and Spring Boot** within a **microservices-based architecture**.
- Implemented and maintained **RESTful APIs** consumed by multiple internal applications and services.
- Applied **clean code principles** and **modular design patterns** to improve readability and maintainability.
- Supported **containerized deployments** using **Docker**, contributing to consistent development and deployment workflows.
- Assisted with **cloud-based deployments**, gaining exposure to production environments and release processes.
- Collaborated with team members in **Agile/Scrum ceremonies**, including sprint planning, stand-ups, and retrospectives.
- Built a strong foundation in **backend fundamentals**, scalable system design concepts, and service-oriented architecture.

PROJECT & IMPACT HIGHLIGHTS

- Built and supported applications used by real users in production environments
- Worked on interactive features that improved engagement and usability
- Collaborated across teams to deliver end-to-end product features
- Developed strong fundamentals in algorithms, data structures, and system design

Education Details:

Master of Science in Computer Science

Roosevelt University — Chicago, IL

Expected 2025
